

P.S. - POSSIBLE THE PL monitor will jitter -  
try changing the 100K  $\Omega$  resistor here to  $\approx 39K \Omega$

## CONVERTING THE FD-68 RGB FOR POSITIVE SYNC MONITORS

REMOVE THE LS-367 AND REPLACE WITH  
THE ENCLOSED ASSEMBLY.

INSERT ASSEMBLY WITH THE NOTCH AT  
THE SAME CORNER AS THE DOT. IF YOU  
RE-INSTALL THE LS-367, BE SURE TO  
PLACE IT IN THE SAME DIRECTION.
